Mr. Ed Edmondson, past president of the US Chess Federation, has formed a new Chess Book Club which offers memebers substantial savings on new publications. A one time initiation fee brings periodic issues of a newsletter entitled CHESSBOOKNOTES which contains detailed reviews of books scheduled to be published in the near future. Members may order these books at pre-publication prices and receive their copies direct from the publisher as soon as they are printed. For more information send a self-addressed stamped envelope to Chess Book Club, c/o E.B.Edmondson, 47-169A Hui Akepa Place, Kaneohe, HI 96744.

Rio-de-Janiero - USCF Robert Hübner of West Germany, Tigran Petrosian of the Soviet Union and Lajos Portisch of Hungary tied for first place with $11\frac{1}{2}-6\frac{1}{2}$ scores in the Men's Interzonal Tournament here, thereby qualifying for the Candidates Matches leading to the next World Championship Match in 1981. Eight Grandmasters in all will compete in the series of Candidates Matches. The unsuccessful challenger from 1978, Viktor Korchnoi, and the last player eliminated in the 1975 series, Boris Spassky, were automatically seeded into the playoffs. The other three competitors will come from the winners of the Interzonal Tournament held in Riga, Mikhail Tal of the Soviet Union, Lev Polugaevsky of the Soviet Union and the winner of a playoff between Hungarians Andras Adorjan and Zoltan Ribli.

Bill Lynch of Billings has clinched the 1979 Montana Grand Prix Championship. With one event remaining, Lynch holds a 39 to 17 point lead over second place Kip Stubberud of elena. Other current standings are as follows: 3 - Ken Shinn, 14; 4 - Jim Loy, 12; 5 -Gordon Shuck, 11; 6-7 - Yasser Seirawan, Marc Lynn, 10; 8 - Matthew Guthrie, 9; 9 - Tim O'Conner, 7; 10-12 - Dan Smith, Andy Shuck, Howard Hoene, 6; 13-14 - Merv Mecklenburg, Charles Jacobs, 5; 15 - Rick Stevens, 4; 16-20 - Mike Jenson, Jack Reddy, Tom Romine, Ray Anderson, George Chue, 2; 21-25 - Roland Brodniak, Coyle Long, Keith Bayern, Chuck Chapman, Gary Ritchie, 1.

I flew to Detroit on August 31st to join '77 Montana Champ Judson Temple, now a resident of Michigan, for the 1979 Michigan Open over the Labor Day weekend. We started slow - Judson losing to a 1237 rated 10th grader and me to an unrated - but we both came back to fashion 5-2 scores and finish 34th and 36th out of 253 and collect some 2nd place B money. Our crowning achievements came in Round 7, when I defeated a 1939 player and Judson revenged his loss by holding the 10th grader's 2077 rated father to a draw. Judson has annotated his most interesting game, played against Steve Olive of Ohio in Round 5:

- <u>a</u> Theory holds that Black's pin of White's KN is strong after White plays P-Q4 but lacks impetus if played before White's P-Q4. Since White intends P-Q4, he first prevents the pin.
- b The Chigoran Defence to the Ruy Lopez.
- C As in many variations of the Ruy, this N is headed for KB5 via KB1 and either K3 or KN3.
- d Black strives to take command of the QB file.
- e Straight out of MCO to this point, but now my knowledge of "book" was exhausted.
- f Now after 16 NxN PxN Black appears well capable of supporting his new QBP so I decided to continue the QN on its path to KB5 and kick Black's N back later with P-QN3.
- g Black had tried this sacrifice in postal chess with some success. His plan is to sac the N for both of White's center pawns and then advance his own center pawns, gaining the initiative.
- h Rejecting the trade 17...BxP 18 BxPch KxB 19 QxB in favor of trying to win the QP outright. As this does not work, Black would do better to make the trade, since White's QP is worth more than Black's KRP.
- i 18...BxQP 19 PxN PxP would give Black a beautiful pawn center, but the cost is too high.
- P-KN3 $\underline{1}$ j Not 19...B-Q1 20 P-QN4. Now Black's N is completely out of play on R4 and will hamper his efforts for some time to come.
- 3 B-R6 R-B2 \underline{k} Black has been completely driven back.
- 4 QR-B1 RxR $\frac{1}{2}$ The trade mentioned in nite $\frac{1}{2}$ is still playable and probably better, 5 BxR o Q-R1 p m To reprotect the QP.
- 6 B-Q2 B-Q1 n Forcing White to play actively. Now 23 B-B1 is met by ...R-B4.
 - -N4 BxQP <u>q</u> <u>o</u> Eliminating any chance of Black trapping the Bishop.

 xQP P-B5 <u>p</u> Apparently winning the QP, but again the poor position of Black's
 - P Apparently winning the QP, but again the poor position of Black's N on R4 will ruin his chances.
 - q Black has no time for R-Q2 or R-B3 since then 28 Q-Q2 wins the N.
 - r N-R1 and N-K2 look weak. Before playing 29 RxKP White must have an answer to Black's threat to regain material with 29...BxN and 30... PxN. After 29...BxN I saw that I had 30 R-K8ch K-N2 31 B-K5ch and 32 QxB/Q8. Having found that much, it was unnecessary at this point to take the time to see if White had a still better answer to 29... BxN (e.g. a possible mating attack).
 - <u>s</u> I did not see a mating attack after 30 R-K8ch, so I settled for maintenance of my material advantage and the elimination of Black's initiative.
 - <u>t</u> Black's sacrifice on move 16 has been completely refuted. He never developed counterplay, and it is worth noting that his N is still out of play on the edge of the board. I could stop here and say "and Black soon resigned" but for a blunder on move 36 which created some interesting endgame play.
 - <u>u</u> The blunder. I was attempting to exchange pieces and saw that with this move Black's B could not avoid capture, but I missed Black's next which costs me the exchange.
 - v White has two Bishops for a Rook, which in this position still constitutes a won game. But, White must keep the Bishops. 39 BxN RxB would be a mistake as White would have difficulty protecting the Qside pawns against 40...R-B7 or 40...R-B8ch and 41...R-QR8.

Mr. Korn, well known as co-editor of MCO 10 and editor of MCO 11, has compiled an interesting overview of the American chess scene and its contribution to the game, both in the U.S. and around the world. He provides sketches of the great figures in American chess, past and present, illustrated with fully annotated games (a total of 64) and interwoven with anecdotes. Consideration is also given to chess art, politics in chess, computer chess, chess publications and possibilities for the future course of organized chess. The book is a fine introduction to the tapestry of American chess history as well as an invitation to further study of the great American masters. - WML

THE CHESS MYSTERIES OF SHERLOCK HOLMES Raymond Smullyan Book Review

Here is a unique book of chess problems for the dedicated puzzle lovers in the chess community. These problems require analysis in reverse! Given a particular position, the reader is asked to determine the move (or moves) which must have taken place immediately before in order to bring about that position, much as Sherlock Holmes might have determined the events which must have preceded a murder or robbery. While of questionable value for improving ones playing ability, the book is undeniably entertaining and challenging for those who love chess problems and logic puzzles. - WML

52 P-QR3 w Black's game is very difficult. White's last fixes the Black QRP. P-N4 Black's N must remain on Q1 to prevent B-N7. The Black N can go to 53 B-Q5 bb R-B1 54 B-N7 R-N1 cc B3 but once there neither it nor the Black R will have any mobility. 55 BxP K-Q2 With pawns on both sides of the board, white's two Bishops become 56 BxP Black very strong. White can make threats willy-nilly which Black must Soon Resigned. strain to defend against.

x Now is the time for this move. y This game illustrates the principal that it is easier to attack than defend. The attacker need spot only one winning line, whereas the defender must anticipate every winning combination. My opponent was now using far more time on the clock as required by his position. z Forced. aa White's pressure now forces an exchange of Knights - favorable to White. bb White now has the forced win of a queenside passed pawn. cc The only move.

Here is my last round game against Don Vandivier of Michigan, a Sicilian:

Have you ever wondered why you lose chess games? Here is a book which tells you what you've been doing wrong. In fact, if you're anything like me, you will feel like you're looking in a mirror of the past as you study the many errors which Soltis describes. Each chapter deals with a particular type of mistake, from tactical oversights to psychological misjudgements, and is fully illustrated with diagrams and analysis from master games. It is said that understanding a problem is half of the solution to that problem, and that is where the chess student stands to benefit from reading this book. If one can learn to recognize the patterns of potential mistakes he should be forearmed to successfully avoid making them. - WML
